Paul Buitink talks to former government official and founder of Solari Report Catherine Austin Fitts about the US black budget, the missing \$21 trillion, the breakaway civilization and whether Musk's DOGE will shed light on all of this. She doesn't think so. Musk doesn't even look into FASAB-F56.

The current administration will try to finish implementing the control grid. Trump does what bankers tell him to do. Stable coins rolled out by the banks will be worse than CBDC Catherine says, it will be like the mafia. She believes you need to reject both, engage in spiritual warfare, stand your ground and buy gold and silver.

We don't need the Federal Reserve. We never did.

If DOGE cut \$1T of wasteful spending, we have been paying too much tax.

If Trump really wanted to save money for the American people, he would issue an executive order like JFK did back on June 4th, 1963 that bypassed the federal reserve system. Trump could order the issuance of currency without interest payments being necessary which would save billions and billions in interest payments to the unscrupulous banksters from the national budget.

The judiciary also needs to be reformed. That should be obvious.

Where Catherine mentions FASB. Statement of Federal Financial Accounting Standards 56 (SFFAS 56) essentially creates a parallel accounting system where the federal government can manipulate or fabricate financial reports without breaking any laws. This should be a much bigger issue in transparency discussions. This is a way bigger slush fund than USAID. SFFAS 56 should be audited.

The costs of healthcare are overloaded with corruption. In many other countries, they have better, more accessible care for far less cost. LESS cost. so where is all the \$ going here in our system? Tell me.
